Engineering News-Record

A Consolidation of Engineering News and Engineering Record

A JOURNAL OF CIVIL ENGINEERING AND CONSTRUCTION

ISSUED WEEKLY

VOLUME LXXVIII

April 1 to June 30, 1917

McGRAW-HILL PUBLISHING COMPANY, Inc.
10TH AVENUE AT 36TH STREET
NEW YORK

ENGINEERING NEWS-RECORD

INDEX TO VOLUME LXXVIII

April 1 to June 30, 1917

A

Accidents on construction, cost and prevention; J. J. Rosenthal, *483, e 513
Activated sludge. (See Sewage treatment.)
Adams: R. W.: Engineering Council organization, 612
Adams, T.: City planning, 247, e 275
Aerators. (See Water purification.)
Aerial navigation:
contract let for new field in Illinois, 668
Topographers can aid, e 657
Agg, T. R.: Intelligent use of road oil, *412
Alcohol, extraction from garbage, Columbus, Ohio, *534
Algæ, multiple inspirators, Oshkosh, Wis., *237, e 275
Allen, K.: Tidal-water sewer-outlet questions, l 219
Alloys: U. S. Bureau of Standards wants data on, 344
American Academy of Engineers: charter before Congress, n 475
American Society of Civil Engineers: war forces abandonment of annual convention, n 375
American Water-Works Association:
abstracts of papers at Richmond convention, 345
annual convention at Richmond, Va., 375
deadlock on cast-iron pipe specifications, 449, e 465
letters from members regarding criticism of society, 584, e 657, 661
revolution or reform for? e 371
Anchor bolts: permanent rail in place of templet while concreting; R. W. Reed, *112
Anderson, W. P.: Concrete floor construction, 74
Aqueducts:
St. Louis, Mo., old conduit breaks alongside trench for new conduit, *495
Winnipeg, Man., ditch construction through muskeg bogs, W. Smaill, *121, *166, concrete mixing plants, h *180, concrete placing, h *220, camp buildings, h *511
Arches:
French battle area, restoration of arch bridges, *309
great stone and concrete arch bridges of the world; J. A. L. Waddell, *358
Manayunk, Penn., concrete arch railway bridge on reverse curve, *388
Philadelphia, Penn., Bensalem Ave., concrete bridge, construction plant, *194
Rock Creek, Calif., three-hinged arch highway bridge built of timber; F. W. Haselwood, *577
Architecture: corporations may be architects, 217
Army training camps. (See Military camps.)
Artillery: car-mounted gun reduces coast defense to engineering problem, *204, F. W. Harris, l 469, R. R. Potter, l 612
Assessments: method of making, street improvements in hillside town; L. L. Hohl, *540
Atlanta, Ga.: fire destroys fifty blocks, *476
Automobiles. (See Motor vehicles.)

B

Backfilling machines:
practice and experiences of cities and contractors, 258
traveling transfer machine used as, h *528
Baldwin, E. H., Elephant Butte dam foundation, *625
Baker, C. W.: History and development of "Engineering News," *6
Baltimore, Md.: Pennsylvania R.R. improvements proposed, *252
Barges: sunken piledriver raised by Ford automobile; W. G. Broadhurst, h 55
Barker, L. B.: Intercepting sewer, Chicago stockyards, *43
Barnes, F. J.: Sluicing silt to reduce canal losses, *337
Barnes, L. B.: Team outfit converted to tractor-trailer, *607
Bassett, J. B.: Drilling rock for Le Claire Canal, *96
Beach paving, Lake Shore protection, Chicago, Ill.; M. D. Blumberg, *535
Beam flexure: notation for; R. Fleming, 102
Beard, R. S.: Broken old concrete not so good as new aggregate, l 372
Belgian relief work should be financed by United States, e 108
Bennett, C. S.: Drop inlets for highway drains, *46
Birdsall, L. I.:
Minneapolis, Minn., water purification, 346
Problems in mechanical filter operation, 538, e 561
Blasting: breaking up frozen ground by horizontal holes under crust, h 167
Blueprinting: machine for washing, drying and ironing, n *287
Blumberg, M. D.: Chicago lake shore protection, *535
Boilers: water containing sodium hydroxide makes soft steel brittle, 520
Bonney, G.: Expansion joint in concrete pavements, *366
Books reviewed:
Activated-sludge process of sewage treatment; E. J. Porter, 604
American petroleum industry; Raymond Foss Bacon, 363
Books reviewed (continued):
American Railway Engineering Association bridge specification in Spanish, 154
American state administration, Principles of; John Mabry Mathews, 151
Artillery ammunition, Manufacture of; L. P. Alford and others, 360
Asphalt pavement—Specifications and properties, 154
Bibliography of scientific and technical writing, 154
Bridges, Steel railway; Edward C. Dilworth; reviewed by A. W. Carpenter, 152
Chemistry of materials; R. B. Leighon, 603
City planning progress in the United States, 1917, 603
Conqueror, The 602
Contracts, specifications and engineering relations; Daniel W. Mead, 364
Design of railway location; Clement C. Williams; reviewed by M. P. Paret, 362
Divining rod: a history of water witching, 604
Education, Coöperative system of; Clyde William Park, 151
Electrical equipment, Its selection and arrangement; Harold W. Brown, 363
Engineering of power plants; Robert H. Fernald, 363
Engineering handbooks; R. Fleming, 148
Engineers' manual; Ralph G. Hudson, 151
Government telephones; James Mavor, 361
Grandes Voutes; Paul Séjourné; reviewed by J. A. L. Waddell, 358
Highway laws of the United States; A. N. Johnson, 603
Industrial enterprises, Administration of; Edward D. Jones, 154
Instructions to locating engineers and field parties; M. P. Paret, 362
John Fritz Medal, 153
Labor legislation, Principles of; John R. Commons, 153
Lettering for draftsmen, engineers and students; Charles W. Reinhardt, 153
Manufacturing costs and accounts; A. Hamilton Church; reviewed by R. R. Potter, 150
Marine engineering, Practical, 153
Mechanical handling and storing of material; George Frederick Zimmer, 364
Military explosives, Notes on; Erasmus M. Weaver, 360
Milk supply, City; Horatio Newton Perker, 153
Mine supplies, Efficient purchase and utilization of; H. N. Stronck and J. R. Billyard, 604
Operation of gas works; Walter M. Russell, 364
Paving economy; Road and street; C. A. Mullen, 603
Red lead and how to use it in paint; A. H. Sabin, 602
Reinforced-concrete design tables; M. E. Thomas and C. E. Nichols, 602
Riveted boiler joints; S. F. Jeter; reviewed by D. S. Kimball, 361
Sacramento water-supply report, 364
Selling your services, 604
State government in the United States; Arthur N. Holcombe, 151
Studies on the digestion of a sewage-filter effluent by a small and otherwise unpolluted stream; R. S. Weston and C. E. Turner, 604
Supplying water by cities to nonresidents, 603
Track work, Winter; E. R. Lewis, 151
Unified accounting methods for industrials; Clinton E. Woods, reviewed by Elihu Cunyingham Church, 363
Ventilation, Some modern methods of; R Grierson, reviewed by D. D. Kimball, 602
Water and sewage, Standard methods for the examination of, 152
Water-supply papers, United States Geological Survey, 365
Borhek, R. J. Sampling concrete aggregates, l 163
Borings: hook connections to extend auger; M. M. Wilcox, h *279
Bradbury, R. R., Homemade paving machinery, h *56
Brake: timber device for rear wheels of heavy trucks, *512
Brake loads. (See Bridge loading.)
Brass pipe. (See Pipe.)
Braune, G. M.: Civil engineers alternate between jobs and classroom, 23
Brewer, A. F.: Portable buildings replace tents for military camps, l 162
Brick: clay from coal mine used for, n 517
Bridge design:
changes should be recorded, e 609
overhead bridges, e 49
riveted tension members, proposed new specification for deducting rivet holes; D. B. Steinman, *546
tendencies of, discussed by bridge-company engineer, *541
Bridge erection: Sciotoville, Ohio River, continuous truss bridge, *343
Bridge floors:
Cambria St. Bridge, Philadelphia, Penn., shallow floor; J. Jones, *39, e 49
pavements. (See Roads and pavements.)
St. Louis, Mo., Municipal Bridge, bulged pavement, 158
Bridge loads:
brake loads on bridges, e 106, F. H. Frankland, l 326, A. W. Buel, l 326, F. H. Frankland, l 566
celebration crowds represent moderate loading, *104
Bridge pier models, Contractor finds many uses for, *608
Bridge renewal: Omaha, Neb., Union Pacific R.R., new method of bridge rolling, *61
Bridge shops. (See Structural shops.)
Bridges:
arches. (See Arches.)
caissons for. (See Caissons.)
clearances. (See Track and trackwork.)
Columbia River Interstate Bridge, designers of; F. H. Frankland, l 164
concrete cantilever bridge with suspended span, 100
foundations. (See Foundations.)
Hell Gate, New York City, opened for traffic, n 61
Hudson River railway bridge near Albany proposed, n 331, n 522
Illinois State Highway Department standard designs; C. Older, *31
Manayunk, Penn. (See Arches.)
Milwaukee Road, Penn., Delaware, Lackawanna & Western R.R. (See Viaducts.)
Moncton, N. B., Petitcodiac River, Caissons sunk; C. H. Hollingsworth, *57, *76, *113
Panama, Rio Chiriqui suspension bridge; A. S. Zinn, *433
Philadelphia, Penn., Cambria and A Sts. (See Girders, Plate girders.)
Rock Creek, Calif. (See Arches.)
St. Louis, Mo., Municipal Bridge approach completed, n *424
Salem, Ore., Willamette River bridge project, n 425
Sharp concrete bridge patent held valid, n 225
Spokane, Wash., damaged by floods, n *525
Syracuse, N. Y., Skew bascule over Erie Canal; A. G. Hayden, *634
viaducts. (See Viaducts.)
Broadhurst, W. G., Raising sunken piledriver, 55
Brown, L. R., Concrete sand testing, 504
Brown, R. T., Handy piledriver, *221
Bucket: dredging, 10-cu.yd. capacity, n *120
Buel, A. W., Different estimates of brake load on bridges, l 326
Building construction:
American Can Co., Maywood, Ill., concreting plant, *289
concrete forms. (See Concrete forms.)
field drilling and riveting, Union Arcade Building, Pittsburgh, Penn., *208
floors. (See Floors.)
New Bedford, Mass., reinforced-concrete warehouse built every five days, *438
St. Louis, Mo., Statler Hotel, fast construction pace, *312
Sparrows Point, Md., plant of the Bethlehem Steel Co., *385
tool "telegraph line," h 222
weak flat-slab concrete building strengthened by adding new steel and wood frame; M. C. Couchot, *460
Pennsylvania, proposed law requiring remodeling of dwelling houses, 193
Building ordinances: progress in safe building control, e 561
Buildings:
Chicago, Ill., dock wall built for river-front structure, *637
East St. Louis, Ill., post office, ends removed with derricks to save stone, h *560
Pittsburgh, Penn., Union Arcade, adding two stories, *208
San Francisco, Calif.; Blinn Estate Building, strengthening of; M. C. Couchot, *460
Seattle, Wash., Bell St. warehouse, concrete floor test, *144, A. O. Powell, l 516
timber, dry rot in; J. N. Jensen, *409
Bulkheads:
Jacksonville, Fla., Commodores Point terminal; H. D. Mendenhall, *299
pipe lines. (See Pipe lines.)
seawalls. (See Seawalls.)
Union Canal, Buffalo, N. Y., concrete replaces old timber-crib, *580
Bunger, M. E.: Denver, Colo., water-supply investigations, *488
Burgess, G. H.: Delaware & Hudson Co. valuation fieldwork methods, *35
Burr, E. B.: Adjusting salaries of engineers, l 219
Business journalism. (See Engineering journalism.)
Byrne, E. A.: Cast-iron pavement blocks, *327

C

Cables, electric power. (See Electric power transmission.)
Caissons:
concrete-lock door closed with hoist; C. H. Hollingsworth, n *57
Grand' Mère, Que., Laurentide Power Co. station; C. H. Covey, *140
locomotive for towing caissons into place; C. H. Hollingsworth, *113
Moncton, N. B., bridge caissons sunk in swift tidal current; C. H. Hollingsworth, *76
timber bridge-pier caisson launched by tipping from unbalanced scow; E. J. Grodske h *367

*, illustrated; l, letters; e, editorials; h, hints; n, notes; a, abstracts

Camps. (See Construction camps, Military camps.)
Canal locks:
Ohio River dam No. 35, lock paving rapidly done; G. W. McAlpin, *529
Troy, N. Y., concrete footings placed by diver, *510
Troy, N. Y., precast concrete cribs used for guide walls, *497
Welland, Canada, accident to gates, n 524
Canals:
Erie, centenial, e 657
irrigation. (See Irrigation.)
Le Claire, Iowa, rock excavation with improvised drill car; J. B. Bassett, *96
Panama, traffic records, n 23, n 606
Union Canal, Buffalo, N. Y., concrete bulkhead wall replaces old timber structure, *580
Canavan, R.: Filing methods, engineer's office, 46
Canopies, railway stations. (See Railway stations.)
Cantonments. (See Military camps.)
Car shortage on railways serious, e 657
Car unloader: device invented by C. A. Perfect, n *336
Cars:
gasoline railway-inspection car, n *432
hopper car of 85 tons capacity, n 306
steel hopper car of 85 tons capacity, n 69
Carbon monoxide poisoning at Ohio construction camp, 654
Case, B. H.: Wanted—Better laws on expert testimony, l 164
Cement: advance in price of, n 64
Cement gun:
home-made device, 363
operator provided with whistle cord; C. H. Chalmers, 512
Cement manufacture:
concentrated potash a by-product, *630
Guatemala City, American mill built, n 199
kiln-fuel feed using low-pressure air, n 288
Chalmers, C. H.: Cement-gun operation, 512
Chicago, Ill.: Lake shore protection built of concrete; M. D. Blumberg, *535
Chile: rainfall diagrams and data, *410
Chimneys:
felling 120-ft. brick stack; W. N. McCrane, h *167
Saganoseki, Japan, concrete, 570 ft. high, *100
Chlorine: Montreal, Que., water purification plant makes its own, 397
City planning:
city engineers should be city planners; T. Adams, 247, e 275
coöperative planning by adjacent towns and cities, 147
Rochester, N. Y., city engineer appoints city-planning superintendent; J. W. Routh, l 469
San Francisco, Calif., developing residence district for industrial workers, 599
Clearance limits, railway track. (See Track and trackwork.)
Cleveland, Ohio: flood prevention plans, Cuyahoga River, *249
Coast defense: car-mounted guns for, *204
Cofferdams:
Cairo, Ill., twin pipe-line intake; W. E. Dunscombe, *165
framed with slotted piles, used successfully on uneven rock bottom; K. D. Maclean, *414
pier form used as inside cofferdam; K. D. Maclean, 463
radial bracing supported by center pile holds large steel dam; G. M. Wiley, h *55
Columns:
defective concrete repaired with simple apparatus; J. D. Evans, h *471
diagrams for design under eccentric loads; W. S. Wolfe, *632
formula correction; H. G. Nevitt, l 566
formula to apply? *279
initial stresses in built members, e 369
Philadelphia, Penn., old subway columns moved without disturbing roof, h *473
stitch-riveting of struts; A. W. Moseley, *327
torsional buckling of Z-bar columns, e 161
United States Bureau of Standards, important series of tests, *639, e 659
Compressed air: jet for cleaning pipe piles, 320
Computing instrument: for reinforced concrete, n 336
Concrete:
alkali, investigation of drain tile in arid West, 81, S. W. Stratton, l 277
fire wrecks warehouses, Quaker Oats Co., Peterboro, Ont., *17, e 49, 633
softened by locomotive gases, Cascade tunnel, Great Northern Ry., 579
Concrete aggregates:
broken old concrete for new paving foundation; C. R. Mandigo, 142
broken old concrete not so good as new aggregate; R. S. Beard, l 372
representative testing sample; R. J. Borhek, l 163
Concrete construction:
bent-bar supports hold heavy reinforcing rigidly, h *559
flat-slab floors. (See Floors.)
floors. (See Floors, concrete.)
negligence causes defects in spillways; E. Lauchi, *28
permanent rail in place of templet to hold anchor bolts; R. W. Reed, h *112
poles. (See Poles.)
unit-construction railway-station canopies built on curve; G. E. Quick, *179
Concrete design:
graphics of reinforced concrete amplified; H. C. Hitt, l 614
straight-bar system of flat slabs; J. Nydegger, *552
Concrete floors. (See Floors, concrete.)
Concrete forms:
anchor bolts for retaining wall forms; S. Warren, h *416
column forms, trace chains preferred to clamps, h 167
designed to give storage space inside of building under construction; E. J. Wheeler, h *270
floor forms used as base of permanent flooring, h 473
old forms reused as base of concrete-roof installation, h 310
pier form used as inside cofferdam; K. D. Maclean, h 463
pinch-bar operated clamp, n *528
settlement of viaduct forms required camber, 537
well-built forms save trouble, *664
Concrete insert, n *528
Concrete mixers:
Ransome "Bantam Paver," n 336
reinforcement for concrete pavement automatically laid; J. M. Oakley, h *462
setting up mixing plant; S. Warren, h 112
Concrete mixing:
Calumet-Sag Canal, Chicago, Ill., handling bulk cement by power, h *510
consistency measured by simple field test; H. A. Thomas, *244, e 275, J. P. Harrison, l 516, H. A. Thomas, 660
railroad plant, wheelbarrow runways replaced by industrial track laid on cars, h *559
revolving steam shovel to feed mixer; D. Okes, h *558
sloppy concrete troubles, n 616
stationary storage and side-gate cars to feed traveling tower concrete plant, h *415
twin mixer plant, 5000 cu.yd. per month, winter work, *289
water content for road concrete, *206
Winnipeg, Man., aqueduct, traveling chutes and central mixing plants; W. Smaill, *180
chute 460 ft. long, h *463
inclined track delivers concrete by gravity, h *194
traveling chutes, Winnipeg aqueduct; W. Smaill, h *220.
Concrete poles. (See Poles.)
Concrete ship to be built at San Francisco, n 620
Concrete tests:
field-made concrete, New York Public Service Commission, 214
seven days' test no criterion for six-month tests; L. R. Brown, 504
Conduits: water. (See Aqueducts; Water mains.)
Connecticut State Health Department reorganization, n 477
Conner, W. E.: Construction features Silver Lake, Vt., hydro-electric plant, *136
Construction camps:
auto horn for summoning superintendent to telephone; S. Warren, h 319, C. E. McCaslim, h *558
logging camp built on flat cars, h *570
men die of CO poisoning at Ohio camps built on cinder dump, 654
permanent camp for power-plant construction forces, *213
rules adopted for Alaskan railway work to keep camps clean and sanitary, h 496
sectional buildings, moved whole, Winnipeg aqueduct work; W. Smaill, h *511
Construction work:
accidents, what they cost and how to prevent them; J. J. Rosenthal, *483, e 513
Cuba, activity in, 668
do not stop, e 369
need of quick organizing thought, e 466
optimistic view of World's Salesmanship Congress, n 618
Price-fixing must meet two basic demands, e 658
use more labor-saving machines, e 323
Consulting engineers. (See Engineers.)
Contractors:
as recruiting aids, e 369
await War Department's call for emergency construction war 115
census of by Engineering News-Record, n 282, n 322, n 330, n 425
fee system of cantonment contracts, n 617
firm invites visitors to see that they get attention, *654
how to serve the country, 270
inspectors should report to engineers, e 562
labor shortage and unreliability a serious problem, 651
New York, offer war services at cost n 58
O'Rourke Engineering Construction Co. sues Passaic Valley Sewerage Commission, 268, e 274
price advances continue, n 287, n 524
United States Navy Department abandons liquidated damages for delays, n 428
Convict labor. (See Labor.)
Copper, tinned copper no better than tin plate as roofing material, 665
Copying paper, home-made, n 281
Corps of Engineers, U. S. A. (See United States Army, Corps of Engineers.)
Cost records:
Hartford, Conn., dam construction records; S. P. Sears, *265
weekly report forms, Illinois State Highway Department; M. W. Watson, *184
Couchot, M. C.: Strengthening flat-slab concrete building, *460
Coulter, W. S.: Sewage treatment, *255
Council of National Defense: progress made, 169
Covey, C. H.: Foundation caissons Laurentide Power Co., Quebec, *140
Cranes:
coal-handling gantry with unusual features, n *335
home-made five-ton track crane; H. J. Gilkey, h *368
Cranes (continued):
Norfolk, Va., Navy Yard, 72-ft. girder span, *126
Panama Canal, all-steel 500-ton, steam operated, *544
portable, for rail laying, n *624
Cribs. (See Foundations.)
Croissant, F. J.: Street-corner radius stakes, *521
Crossovers. (See Switches.)
Crowds as bridge loads. (See Bridge loading.)
Crowe, F. T.: Draglines operated by derrick hoists, h *319
Culverts:
drop inlets where highway parallels railroad; C. S. Bennett, h *46
Illinois State Highway Department standard designs; C. Older, *31
Cupper, P. A.: Oregon irrigation law, 254
Curbs:
batter on front preferred; A. N. Johnson, l 470
curb walk, Chicago, Ill., *158
monolithic curb with integral asphalt expansion joints; E. E. Kirkpatrick, *329
setting street-corner radius stakes; F. J. Croissant, h *521
Current deflectors. (See Jetties.)

D

Dalzell, A. G.: Tidal-water sewer outlets, l 516
Dams:
Australia, New South Wales, Upper Murray storage project, n 437
boulder-filled wire baskets, California, *103
Dublin, Ohio, Scioto River flood-control, duplex outlets, *400, e 418
Elephant Butte, N. M., Grouting foundations; E. H. Baldwin, *625
Hartford, Conn., water-works, field-work and office records; S. P. Sears, *265
Keechelus, U. S. Reclamation Service, North Yakima, Wash., foundations; R. E. Post, *272
Kensico, New York City water-supply, paving top; R. R. Bradbury, *56
Ohio River dam No. 35, lock paving; G. W. McAlpin, *529
Porto Rico, settlement observed on two earth dams, *596
Rochester, N. Y., combination of bridge and sector types of movable dams, *408
San Pablo, Calif., large earth dam project, 509
spillways. (See Spillways.)
Stanley Lake, Colo., slips in large earth dam; J. E. Hayes, *440, A. L. Fellows, *445, R. W. Gelder, l *612
Sweetwater, California, "visitors welcome" policy pays, 271
Davenport, Iowa, financing river front improvement without cost to taxpayers, *481
Denton, A. P.: Monolithic brick pavement, *130
Depy, Jr., A. B.: Concrete mixer as hoist, *416
Derricks:
guy traveler derrick for rebuilding elevated railway; G. D. Fried, *113
huge derrick handles steel car frames, *420
Detroit, Mich., plans $20,000,000 outlay for public works, 171
De Wolf, G. P.: Track material for France, l 613
Ditching. (See Trenching.)
Dolke, Jr., M. F.: Drafting room teamwork, 48
Doty, A. H.: women draftsmen, l 613
Drafting rooms:
Northern Pacific Ry., St. Paul, Minn., equipment, *648
teamwork promoted by chief draftsman; W. F. Dolke, Jr., 48
Draftsmen:
aëronautic draftsmen difficult to get, n 523
military status of, l 162
women draftsmen would release men for more arduous work; C. E. Newell, l 469, J. Webb, l 564, A. H. Doty, l 613.
Draglines:
operated by derrick hoists; F. T. Crowe, *319
railroad construction, eliminate haulage equipment; W. A. Pillons, *655
Drain tile:
concrete, effect of alkali soils on, 81, S. W. Stratton, l 277
strung on gas pipe before laying; W. G. Stone, 560
Drainage:
Indiana, Calumet drainage project, 339
interstate drainage causes litigation, 411
need of pushing land drainage, e 513
Drainage areas: forestation. (See Forestry.)
Drawing instrument: sliding diagram for plotting stream discharge; F. H. Kingsbury, *422
Drawing and drawings:
carrying case; F. E. Potter, *472
device for plotting offsets, *157
isometric perspective for complicated transit plan, *47
mounted drafting board, n *176
profile paper for railroad topography, F. T. Howes, 213
tracings reproduced by simple process, C. G. Lutts, 421
Drayer, C. E.: Criticism engineering council, l 277, e 321
Driers: portable sand and stone drier, n *176
Drill sharpeners: Leyner jacksteel, n *120
Drills and drilling:
large-bore drill hole economical, h 222
powerful drill-car effective in uneven, spongy rock; J. B. Bassett, h *96
Dunscombe, W. E.: Saving cofferdam, intake, Cairo, Ill., 165

E

Earthwork: shrinkage of railway fills. (See Railway construction.)
Efficiency engineering:
scientific planning applied to industrial-relations management; F. A. Kellor, 82
teamwork promoted by chief draftsman; W. F. Dolke, Jr., 48

*, illustrated; l, letters; e, editorials; h, hints; n, notes; a, abstracts

321339

Electric locomotives. (See Locomotives.)
Electric power: automatic ever-ready outfit for isolated electric supply, n *120
Electric power transmission: longest power cable span to cross St. Lawrence River, 420
Elevated railways, Chicago, Ill.:
rebuilt without stopping traffic, *340
temporary stringers for tracks, *421
Elevators:
to supply concrete plant, h *464
(See also Hoisting machinery.)
Embankments: railway construction. (See Railway construction.)
Engineering:
efficiency wins, e 323
inventory of handbooks: R. Fleming, *148
milestones in science of: R. Fleming, 600
need of quick organizing thought; e 466
prospects for activity from many industrial centers, 86
scientific spirit needed for, e 610
use of models on construction work suggests wide field, e 611
Engineering council:
organize on a broad basis; R. W. Adams, 612
Will it satisfy the demand? C. E. Drayer, l 277, e 321, R. W. Adams, l 612
Engineering education:
civil engineer students alternate between jobs and classroom; G. M. Braune, 23
should not students learn how to study? E. H. Goldstein, l 218
show students how to observe; A. D. Millard, l 372
Engineering formulas: nomenclature committee considering symbols; A. N. Johnson, l 470
Engineering journalism:
technical journal as an institution; J. H. McGraw, l
the new technical journalism, e 50
Engineering library: Cleveland Engineering Society, 668
Engineering literature: revised editions? R. Fleming, 360
Engineering News, History and development of; C. W. Baker, *6
Engineering News-Record:
Charles Whiting Baker retires as Editor, e 273
editorial staff of, *59
engineers' endorsement of, 52, 110
Engineering profession: honor involved in contractor's suit, e 274
Engineering Record:
editorship of E. J. Mehren; R. K. Tomlin, Jr., development and history of; E. J. Mehren, *2 *5
Engineering schools:
graduates classified in military census, 118
hold students back! e 321, W. G. Raymond, l 517
military preparedness work by, 93
principles of conduct for students, n 333
University of Cincinnati, coöperative method in civil engineering instruction; G. M. Braune, 23
Engineering societies:
activity in national defense, 109, 518, 567, 614, 662
aid preparedness movement, n 58
Chicago Conference on Engineering Coöperation, e 49, 117
New York City building of United Engineering Societies nearly completed, *669
rally to aid in nation's defense, 116
war preparation by, e 49, n 58
Engineers:
Army. (See United States Army, Corps of Engineers.)
adjusting the salaries of: E. B. Burr, l 219
advisability of trip to South America; B. T. Moote, 262
as business men, 183
California engineer stands up for profession, e 609
consulting engineer, unjustifiable use of term; G. C. Whipple, 138
coöperation necessary for recognition and service; G. S. Williams, 500, e 515
expert testimony by. (See Expert testimony.)
for engineering work, e 417, J. Bayer, l 569
getting what they want, Iowa example, e 562
heads of important war posts, e 160
license laws in Wyoming simplified, n 282
military engineer's opinion of, n 567
national need of in war emergency, e 50
needed in real-estate deals, n 45
social responsibility of, e 107
united action by, e 161, C. E. Drayer, l 277
unity the slogan of, e 322
urged to get into political life, n 474
Evans, J. D: Repairing defective columns, h *471
Evaporation: empirical formula developed; R. E. Horton, *196
Excavating machinery:
traveler with clamshell bucket on Boston, Mass., subway work; P. C. Nash, n *508
(See also Draglines; Steam shovels, etc.)
Excavation: Frozen ground broken by horizontal holes under crust, 167
Expert testimony: wanted—better laws on; B. H. Case, l 164
Explosions: reinforced concrete withstands explosion, n 350

F

Fellows, A. L.: Slips in Stanley earth dam, *445
Fence: wire and concrete, Catskill aqueduct land; A. W. Tidd, *91
Filing:
catalogs and pocket maps in engineer's office; R. Canavan, 46
photographs, U. S. Office of Public Roads and Rural Engineering, n *281
Filters, sewage. (See Sewage treatment.)
Filters, water. (See Water purification.)
Finance: annual cost of public improvements; A. J. Post, l *324
Fire prevention:
fifth of all fire preventable, n 34
war economies as a text, n 598
Pittsburgh, Penn., prophecy come true, e 217
Fire protection:
steel fire-doors of corrugated sheets, n 432
terms defined, 533
zinc borate retains fire-resisting power, 570
Fires:
Atlanta, Ga., destruction of fifty blocks, *476
Peterboro, Ont., Quaker Oats Co., concrete structures wrecked by intense heat, *17, e 49, 663
Flag pole: breaking of wooden pole shows danger of decay; A. S. Lotspeich, 213
Fleming, R.:
Inventory of engineering handbooks, *148
Milestones in engineering science, *600
Notation for beam flexture, 102
Flood control:
Dublin, Ohio, dam contributes to science, e 418
Miami Valley, Ohio, same thought on, e 321, A. E. Morgan, l 326
Flood prevention:
Cleveland, Ohio, Cuyahoga River straightening, *249
Kansas City, Kan., to complete Turkey Creek diversion project, n *377
Weather Bureau warnings save flood damage, e 160
Floors:
concrete floor forms as base of permanent flooring, 473
concrete:
girderless system with straight-bar reinforcement, *550, J. Nydegger, *552
Johnson patent rejected by U. S. Circuit Court, n 333
selection of aggregate, patching, protective treatment; W. P. Anderson, 74
tar paper to deaden noise, 374
tests of mushroom flat-slab floor, Bell St. warehouse, Seattle, Wash., *144, A. O. Powell, l 516
Florida creates board of engineering examiners, n 477
Flumes: curves for semicircular flume computations; D. C. McConaughy, *520
Forestry: Pennsylvania water-works reforest catchment areas, 297
Formulas, Engineering. (See Engineering formulas.)
Foster, R. A.: Leasing irrigated land on trial, 25
Foundations:
caissons. (See Caissons.)
concrete cribs, precast, used to make lock guide walls, Troy, N. Y., h *497
dock wall for river-front building, *637
river sets concrete footings by guide frames, h *510
Moncton, N. B., bridge. (See Bridges.)
Philadelphia, Penn., City Hall, Subway station construction, *293
pumps for emptying shaft hung from movable overhead truss; R. E. Post, h *272
sewers. (See Sewer construction.)
Frankland, F. H.:
Columbia River Interstate Bridge, l 164
Different estimates of brake load on bridges, l 326
Freight handling:
car shortage a serious problem, e 657
motor truck vs. rail for freight haulage; C. C. Williams, 315, M. B. Greenough, l 660
New York City, cargo masts for piers; C. W. Stamford, h *453
Freight stations. (See Railway freight stations.)
Fried, G. D.:
Guy traveler derrick for rebuilding elevated railway, h *113
Jacking wagons, elevated railway track construction, h *221
Frost, George H., Founder, Engineering News. (See Engineering News.)
Frozen ground excavation. (See Excavation.)
Fuller, E. S.: Portable weirs, *373
Fuller, G.W.: Charging relations between sewage disposal and water-supply, 11

G

Garbage collection: Los Angeles, Calif., motor trucks, 239
Garbage disposal:
Alcohol extraction, Columbus, Ohio, experiments, *534
Los Angeles, Calif., Incinerator abandoned, e 323
Rockford, Ill., Report on garbage piggery, 210, e 216
sites for garbage plants, e 160
squeezing last drop from garbage, e 561
Gardner, H. A.: White paint for gasoline tanks, 373
Garland, J.: Rail straightener, h *374
Gas engine: marine type of Diesel engine adapted to water-works; T. O. Lisle, 256
Gasoline tanks. (See Tanks and standpipes.)
Gelder, R. W., Standley Lake dam, l *612
Giles, J. M., Porto Rico earth dams, *596
Gilkey, H. J.: Home-made track crane, h *368
Girders, Plate: Philadelphia, Penn., Cambria St. Bridge, Shallow floors and horizontally curved girders; Jones, *39, e 49
Goethals, Gen. George W.:
made head of New Jersey State Highway Department, n 58
to head national shipbuilding corporation, n 173, n 477
Goldstein, E. H.: Should not engineering students learn how to study? l 218
Grade crossings: California, inspection, n 297, 645
Grade separation:
Chicago, Ill., Chicago, Rock Island & Pacific Ry., labor problem, 186, e 216
elevation vs. depression, and track change vs. street change, 129
Grade separation (continued):
New York City, Beginning of West Side improvement n 525
Syracuse, N. Y., plans reported by B. J. Arnold, *402, e 417
Grader: subgrader design for roadwork, *519
Gravel:
bin to store gravel at low cost; F. H. Van Saun, h *559
standard sizes for road work, Wisconsin, 260
drier. (See Driers.)
Great Lakes: port improvements under way and contemplated, 548
Greenough, M. B.: When to use motor-truck transportation, l 660
Griffith, J. H., and Mosley, T. J.: Testing machines, United States Bureau of Standards, 188
Grodske, E. J.: Launching timber bridge-pier caisson, *367

H

Harbors:
Antofagasta, Chile, projected expenditure of $6,500,000; F. McCoy, *191
Great Lakes, port improvements under way and contemplated, 548
Wilmington, Del., projected development, n *427
Harris, F. W.: Car-mounted guns for coast defense, l 469

Hogentogler, C. A.: Oil for road maintenance, 454
Hohl, L. L.: Street improvement assessments, *540
Hoisting machinery:
concrete mixer used as hoist to sink pump well; A. B. Depy, Jr., h *416
elevators. (See Elevators.)
largest steam hoists, n 318
ore dock with 384 electric hoists, *606
racks speed unloading of blocks, h *464
steam hoist with sheave and drum operating independently, n *624
Hollingsworth, C. H.: Construction foundations Petitcodiac River Bridge, *57, *76, *113
Hoover, C. P.:
Sewage treatment at Columbus, *447
Water purification, Columbus, 250
Hoover, Herbert C., to head United States Food Board, *168
Hopkins, C. C.: sewer tunneling, Saugerties, l 276
Hornbein, J.: Idaho bench lands irrigated, *192
Horton, R. E.:
Empirical formula developed, *196
Better hydrology, 490
Howes, F. T.: profile paper for railroad topography, 213
Hutchins, H. T.: Tests showing parts of city streets used, *201
Hydraulic sluicing of silt to reduce canal losses; F. J. Barnes, *337
Hydraulic metal forming press, 1000 tons capacity, n *624
Hydro-electric plants:
Grand' Mère, Que., Laurentide Power Co., foundation caissons; C. H. Covey, *140
Ontario Power Co. purchased by Canadian Government, n 523
Rush Creek, Calif., Pacific Power Corporation, construction of, *313
settling ponds for removing silt, Pacific Power and Light Co.; J. W. Swaren, 298
Silver Lake, Vermont., highest head in East, construction features; W. E. Conner, *136
Hydrology:
analysis supplants mass judgment, e 418
failure of hydraulic projects from lack of water prevented by better hydrology; R. E. Horton, 490

I

Ice: buzz saw for cutting, h *156
Illinois: engineer officials under new laws, 225
Inlets: drop for culverts; C. S. Bennett, *46
Inspectors: should report to engineers, e 562
Inspirators. (See Water purification.)
Intakes. (See Water-works intakes.)
International Good Roads Congress, Ottawa meeting, 228
Irrigation:
California, increase in area, n 188
ditch dredging costs, California, n 267
Grand Valley irrigation project, Colorado, U. S. Reclamation Service, sluicing silt to reduce canal leakage; F. J. Barnes, *337
Idaho bench lands irrigated by pumping seepage water; J. Hornbein, *192
Imperial Valley, Calif., all American canal not feasible, n 227
increase national food resources, e 159
leasing irrigated land on trial; R. A. Foster, 25
Oregon, irrigation district law, P. A. Cupper, 254
speeding up irrigation on United States Reclamation Projects, n 226

*, illustrated; l, letters; e, editorials; h, hints; n, notes; a, abstracts

Irrigation (continued):
study in valuing water rights near Denver, Colo.; M. E. Bunger, *488
Washington counties issue bonds, 667

P

Paints and painting:
lead content of a leaded zinc paint, how to increase, *472
white for gasoline tanks; H. A. Gardner, 373
Panama Canal. (See Canals.)
Panama Canal Zone: health conditions improving, n 579
Patents:
Johnson concrete floor patent rejected by U. S. Circuit Court, n 333
library of engineering patents wanted, e 610
Sharp concrete bridge patent held valid, n 225
war status of German owned patents, l 565
Pavement breaker run by gasoline engine, built for trench work; J. H. McGinn, h *511
Pavements. (See Roads and pavements.)
Pearson, Edward J.: made president of New York, New Haven & Hartford R.R., *285
Penetrometer which eliminates test variations, n *336
Photograph file. (See Filing methods.)
Pickels, G. M.: Stadia surveying, *328
Piers, meaning wharves. (See Wharves, and docks.)
Piggery. (See Garbage disposal.)
Pile-drivers:
handy, rigged with gas engine and hook tripper; R. T. Brown, h *221
motor truck and road roller to drive trench sheeting; W. De W. Vosburg, h *366
swinging leads built to carry man, n *560
Piles and piling:
cofferdams. (See Cofferdams.)
I-beams fail as piles, Jacksonville, Fla., bulkhead construction; H. D. Mendenhall, *299
in soft ground, spread; pulled back by turnbuckles, h *423
pipe, cleaned with air jet, h 320
puller for wood sheet piles; L. B. Wycoff, h *607
teredo. (See Teredo.)
Wakefield slotted sheet piles successfully used on uneven rock bottom; K. D. Maclean, *414
wharf fender piles driven by 4-ft. drop, 663
Pipe:
brass, cause of failure, 472
Pillans, W. A.: Dragline railway work, *655
cast-iron specification deadlock, American Water Works Association, 449, e 465
wood-stave:
creosote gives no taste to water, n 533
Everett, Wash., water-supply; R. E. Koon, *246
Pipe joints:
calking sewer-pipe joints; T. V. Stephens, h *374
paper in place hemp for packing, n 46
water mains, leaks. (See Water consumption.)
welded, pressure tests of; F. H. Sibley, *520
Pipe laying:
water mains. (See Water mains.)
(See also Trenching machines.)
Pipe lines:
air valves on wood-stave pipe lines in vented vaults, h *568
leaking lap-welded steel pipe repaired and tested by bulkheaded sections in the field; C. A. Lee, *70
Pitot tube: modified, gives high accuracy, *570
Plumbing: financing water-supply and sewer connections; E. M. Proctor, l 372
Poles:
concrete, made by centrifugal process, *405
Wenatchee, Wash., concrete electric light poles built in place, h 187
Post, A. J.: Financing public improvements, l *324
Post, R. E.: Keechelus dam, *272
Potter, F. E.: carrying case for drawings, *472
Potter, R. R.: car-mounted coast-defense guns, l 612
Potts, Clyde: war status of Imhoff and other German patents, l 566
Powell, A. O.: Seattle building test, l 516
Price-fixing must meet two basic demands, e 658
Proctor, E. M.: financing water and sewer house connections, l 372
Production: we will get down and dig, e 273
Public improvements: war not to cause stop, e 609
Public service commission: problems of, brought about by war conditions, e 419
Public utilities:
problems brought about by war conditions, e 419
shall dividends be paid during war? e 563
state regulation of municipally owned utilities, e 106
Pumps and pumping:
centrifugal driven from rear wheel of automobile, h *222
Clarksburg, W. Va., gas engine driven centrifugal water-works pumps, 446
De Laval boiler-feed pump, n *288
Gould's diaphragm force pump, n 528
home-made emergency portable-pump outfit, h *112
marine type of Diesel engine adapted to water-works; T. O. Lisle, *256
portable plant for road contractor, h *47
portable road-oil power pump, h *480
pump efficiencies depend on service period, n 505

Q

Questionnaire, of what value? e 515
Quick, G. E.: Unit-construction railway-station canopies, *179

R

Race, J.: chlorination and chloranine, 606
Rails:
Government and railways must coöperate to improve, e 611

*, illustrated; l, letters; e, editorials; h, hints; n, notes; a, abstracts

Rails (continued):
progress in breakage prevention problem, *455
publicity reduces rail breakages, e 106
straightener made from junk; J. Garland, h *374
turntable cuts cost of handling relay rails; J. H. Sawkins, h *414
Railway construction:
clearance limits established by Illinois Public Utilities Commission, *446
dragline save haulage, W. A. Pillans, *655
embankments, when to use trestles in making, h 157
portable crane for track laying, n *624
rolling roadbed to compact subgrade, h 281
shrinkage of new embankments, 202
Railway electrification: maintenance-of-way costs increased by, 10
Railway freight station, double-deck, for city terminals, 69
Railway grade separation. (See Grade separation.)
Railway location: topography platted on profile paper; F. T. Howes, 213
Railway maintenance-of-way:
cost increased by electrification, 10
labor conditions affect, e 562
Railway rates: increase should be allowed, e 465
Railway stations:
Danville, Ill., unit-construction reinforced-concrete canopies built on curve; G. E. Quick, *179
St. Paul, Minn., Union Station plans, *486
Railway terminal: Baltimore, Md., Pennsylvania R.R., proposed changes, *252
Railway valuation. (See Valuation engineering.)
Railway yards: hump profiles for gravity yards, *212

Railways:
Canada:
divided reports on problem, n330
problem of, e 321
solutions of problem offered, *353, S. Rea, 597
what shall be done with the bankrupt railways? e 370
car shortage serious, e 657
electrification. (See Railway electrification.)
handling heavier tonnage, 668
maintenance-of-way. (See Railway maintenance-of-way.)
operation during war, n 172
southern Pacific loses $30,000,000 land suit, 228
stations. (See Railway stations.)

Reed, R. W.: concreting anchor bolts in place, n *112
Reservoirs:
Covington, Va. (See Water-works.)
Hetch Hetchy, San Francisco, Calif., water-supply, clearing site, *242
oil-wastes storage, Neodesha, Kan., n 504
Piute, Utah, slope riprap repaired, n 580
Pasadena, Calif., Wilson Ave., wooden roof collapse; S. B. Morris, n 58, *85
Richardson, B. K.: Water-main records, *280
Ritchie, G. T.: Stake holder, *521
River and harbor work not military necessity, e 561
River discharge. (See Stream discharge.)
River walls: Davenport, Iowa, improvement made without cost to taxpayers, *481
Rivers: current deflectors to protect banks, *194
Cuyahoga, Ohio, plans for straightening through Cleveland, *249
pollution of. (See Water pollution.)
Rivets and riveting:
allowance for rivet holes in built-up tension members; D. B. Stelman, *546
stitch-riveting of struts; A. W. Moseley, *327
stitched rivets spaced for bending; E. J. Squire, 616
tests of tension rivet connections, Brooklyn Polytechnic Institute; C. R. Hill, *72
Road machinery:
Ozark Mountain region requires new type of machine, 139
subgrader devised by E. G. Carr, *519
Roads and pavements:
Alaska, road built on foundation of ice, n 264
alignment:
central parkway eliminates danger on bad curve; W. J. Healey, *214
pusher and momentum grades, Why not? S. C. Redd, 471
asphalt:
bituminous foundations for sheet-asphalt surfaces; Kirschbraun, *591
New York City, repaving Broadway over subway 292
bituminous:
macadam reconstructed as bituminous macadam; H. J. Spelman, 246
maintenance work, handling hot oil by unique method; H. M. Lukens, *200
brick, King County, Washington, monolithic; A. P. Denton, *130
Roads and pavements:
Baltimore, Md., repaving Gay St. with recut granite block, 638
bridges, New York City, destruction by heavy traffic, *306
Roads and pavements (continued):
broken old concrete as aggregate for new foundation concrete; C. R. Mandigo, 142, R. S. Beard, l 372
Canadian Government tests road materials, n 583
cast-iron blocks along curb; E. A. Byrne, *327
Chicago, Ill., proposed 50-mile military road north, n 573
concrete:
county guarantees its cement estimate n590
expansion-joint armor plates hinged to supporting bridge; G. Bonney, h 366
how much water should be used? *206
macadam as a base; W. Ramsey, l 325
sub-base, opinions on the need of, 459 e 515
freight shipments by motor trucks; M. B. Greenough, l 660
foundation material a matter of judgment, e 609
construction costs lowered by close attention to details; L. H. Morris, *207
curbs. (See Curbs.)
desert roads, California, sand-drift barriers, *260
drainage by deep side ditches dangerous n 207
earth roads, Utah, built by tractors for $60 per mile; E. R. Morgan, *268
haulage of materials on construction, 272
highway work should not stop, e 273
Iowa State Highway Commission favors patrol maintenance, n 30
Iowa State Highway Commission, plan to abolish defeated, e 323, e 562
Kansas, new road law, 203, n 333
Los Angeles County, Calif., division headquarters rearranged for efficiency, *598
macadam best maintained with thin oil that will penetrate and harden quickly; C. A. Hogentogler, 454, J. Logan, l 564
maintenance by intelligent use of road oil; T. R. Agg, *412
military strategy and the good roads propaganda, e 514
New York State construction program curtailed n 618
New York State, convict labor employed, n 614
New York State engineers utilize lull in construction 521
oil heated in trough by burning water and distilled mixture, h *165
oil-maintained roads at $25 per mile, 570
Ontario, Canada, creates highway department, n 426
Oregon county awards prizes for maintenance, 387, e 417
Oregon, extensive construction program, n *621
Paris, Tex., old concrete foundation furnishes new base in street widening; H. Helland, Jr., *615
paving machinery made from odds and ends; R. R. Bradbury, *56
permanent roads encouraged by Michigan law; D. A. Thomas, 301
preservation of section corners in permanently paved roads; N. C. Rockwood, *156
profit or loss in hauling construction materials, A. D. Thompson, 98
Rhode Island levies road tax on towns, n 546
ridge relocation for Ozark Mountain roads, 202
San Francisco, Calif., paving ordinance helps development; J. M. Owens, *263
Southern States to spend $100,000,000, n 388
standard sizes for stone and gravel, Wisconsin, 260
street assessments in hillside town; L. L. Hohl, *540
street railway, lowering pavement along rails; E. W. Wendell, *158
Texas, highway law signed, n 228
traffic:
allowable traffic for different types, n 85
state aid for wide tires, Missouri, n 130
tests show what parts of city streets are used; H. T. Hutchins, *201
Vermilion County, Ill.:
contractors' methods differ, *21
fences moved at private expense, n 492
wood block:
creosote affects tar and asphalt fillers, n 387
increase in use of, n 446
Rochester, N. Y., City engineer appoints city-planning superintendent; J. W. Routh, l 469
Rock crushers: standard sizes for broken stone, Wisconsin, 260
Rockwood, N. C.: Section corners in paved roads, *156
Roofs:
Fink roof truss, graphical solution; W. V. Kulp, *569
Pasadena, Calif., reservoir roof failure; S. B. Morris, *85
tinned copper no better than tin plate, 665
